Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are clusters distinguished by their different substituents "X". The species are independent or distinct because a search for similar compounds bearing, for instance, alkoxy moieties would not necessarily produce references that teach those crosslinkers to which are bound any other embodiment of "X".

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Presently, claim(s) 29 and 39 are generic.

Art Unit: 1712

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

In addition to their election of one of the aforementioned species, the Examiner requests clarification of the appearance/connectivity of units

Art Unit: 1712

$R_eX_fSi_2O_{2.5}$. While the Examiner is familiar with the first two types of units outlined in the formula of claims 29 and 39, it is unclear what form the unit ($R_eX_fSi_2O_{2.5}$) takes. It is believed that $R_eX_fSi_2O_{2.5}$ is possibly shorthand notation for a silicon atom in a polyhedral structure that has bonded thereto a $-OSi(OH)R_gX_{2-g}$ group. The last unit, $R_gX_hSi_2O_2$ is believed to refer to units wherein one of the silicon atoms occupies a corner of a completely condensed polyhedral structure and has bonded thereto a $-OSiR_gX_{3-g}$ moiety. Applicant is asked to correct the Examiner if his assumptions are false.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc S. Zimmer whose telephone number is 571-272-1096. The examiner can normally be reached on Monday-Friday 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Randy Gulakowski can be reached on 571-272-1302. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
